INSTRUMENTATION & PROCESS AUTOMATION TRAINING

Avidus Engineering Private Limited (AEPL) Company located at Mehdiapatnam, Hyderabad is among the leading technical service providers for Engineering Design, Migration of Engineering legacy drawings to latest Smart drawings, trading of Engineering training equipments and running a unique Instrumentation and Process Automation training Program and undertaking engineering college project work.

Training constitutes a vital part of AEPL's business and the courses are first of its kind in training field in Andhra Pradesh. Courses are designed and taught by Industry Experienced Engineers who worked for Oil and Gas, Power Plant and Petrochemicals Industries for over 25 Years.

The Courses includes hands-on practical training on industry oriented equipments like PLC/SCADA programming, Control Valve/Relief Valve Sizing, PID tuning on pressure/Flow/Level/Temperature simulators. Moreover course module contains training in Instrumentation and Process Automation design drawings and specifications.

Candidates attended the training at AEPL can apply jobs in field of Instrumentation and Process Automation Jobs in India and abroad in various field of Design, Construction, Operation & Maintenance and in Various Process Industries like Power, Oil & Gas, Refinery and Petrochemical.

Engineering Degree / Diploma in Instrumentation, Electronics, Communications and BSc / MSc Degree Holders, Working Professionals and Industry Sponsored Candidates and Final year students can avail the opportunity to upgrade their skills and enhance their career.

AEPL training is bridging the gap between fresh Engineers and Industry.

A part from training, AEPL is an authorized dealer of Engineering training equipments used in Engineering and Diploma college labs and training institutes for providing hands-on experience.
